

PROJECT: TELOPEA PARK SCHOOL SENIOR CAMPUS EXPANSION

November 2023

How we work

As Canberra continues to grow, the ACT Government is building new public schools and upgrading education facilities across Canberra. This means people moving to new suburbs and growing regions can access public education close to where they live.

We are working hard to ensure that every child has the benefit of great, accessible and sustainable school infrastructure that supports high-quality education.

Our staged approach to expanding and modernising Telopea Park School Senior Campus will follow these steps:

1. Feasibility Study

This stage considered the needs of the local area now and into the future, to ensure the right infrastructure is provided in the right location to meet the needs of the community.

2. Planning **CURRENT PHASE**

This stage involves site master-planning and preliminary sketch planning.

3. Design

The design stage takes the approved masterplan option and develops it in detail to ensure the design meets the school's operational and functional requirements.

4. Delivery / construction

Procurement of a Head Contractor (builders and their sub-contractors) will occur. Information during this process is limited due to probity requirements. Once a contract is finalised, the builder will be announced.

Where we are at

The school executive, the Education Directorate and Major Projects Canberra are collaborating on site master-planning. In the interim, two top-quality double-storey Relocatable Learning Units (RLUs) totalling eight classrooms will meet the school's current capacity needs. The major components of the senior campus expansion project work are:

- The 200 *current* Telopea Park School student places accommodated in RLUs will move into new permanent structures.
- The new structures will provide capacity for up to an *additional* 300 students to join the school.

Next steps

Visit **'YourSay Conversations'** to leave feedback: <https://yoursayconversations.act.gov.au/telopea-traffic>. This **'first phase'** feedback opportunity is open until **Friday 15 December 2023**.
